HOME SERVICES ABOUT CONTACT

**PROJECT OVERVIEW**

RGN Construction works with some of the Pacific Northwest's top architects to produce beautify crafted buildings. The challenge was to surface RGN's body of work in a visual way while also introducing the company's personality, team, and offerings.

The site is designed to be simple yet communicative, modern yet approachable, visual yet concise. The final solution is both web and mobile optimized, as well as flexible and scalable enough to be maintained and grown in-house.

**HOMEPAGE:**
**ABOUT RGN**

With over 20 years of experience in the construction industry, Founder Rich Nord and RGN Construction have earned a solid reputation for building with the highest quality workmanship, exceptional service, dedication, and within budget. We specialize in custom homes, commercial buildings, remodeling projects, and construction management. All projects follow time-tested budget, schedule, and quality procedures to ensure success.

OUR PROCESS

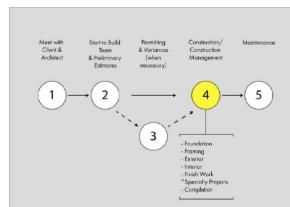

## Annotate Your Screenshot

RGN has built throughout the Northwest, including the greater Seattle area, Mercer Island, Kirkland, Bellevue, Medina, throughout Camano, Whidbey and Samish Islands, Bellingham, and throughout Skagit and Snohomish Counties. We've also done work in Eastern Washington.

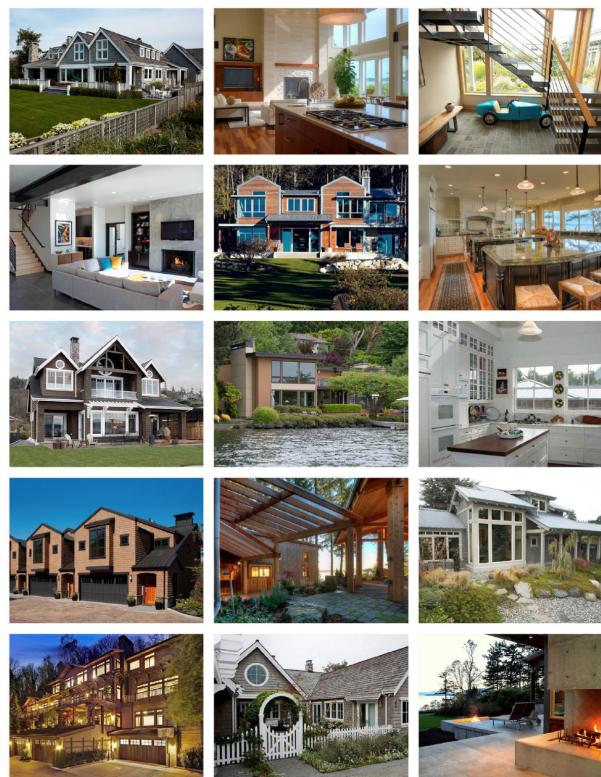

We have an unpassed commitment to service and take great pride in our ability to control quality, budget, and schedule. Each project has an individualized team who is dedicated to meeting all of your needs.

All its core RGN is a family run business. Founded by Rich Nord after working with his father in the construction industry, RGN today is helped managed by several of the Nord siblings. The full team includes four Project Manager and Estimators, and four Superintendents, each capable of seeing projects through completion.

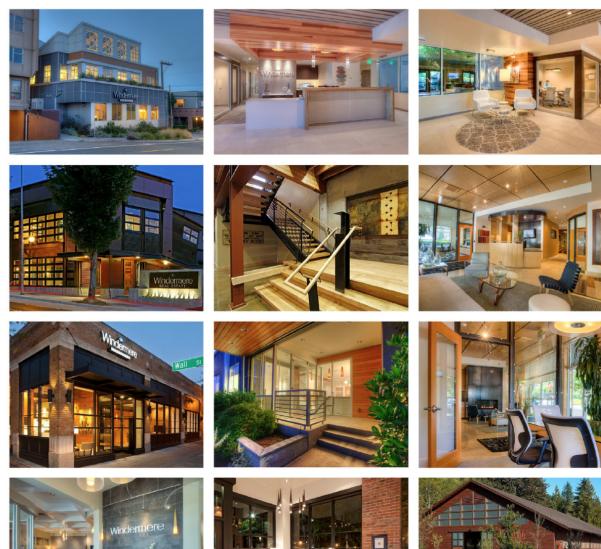

RGN also maintains good working relationships with several of the finest architects and designers in the region (in fact, the majority of our projects come directly from designers, architects, and client referrals), and with some of the best subcontractors.
